

Diabetes Today Resource Team

**Jackson & Franklin/Williamson Counties
Healthy Communities Coalitions**

Strategies

Increase the proportion of persons with diagnosed diabetes who receive formal diabetes education by:

- Conducting self-management classes
- Increasing patient referrals from healthcare providers for services

Increase the proportion of people with pre-diabetes or multiple diabetes risk factors that practice diabetes prevention and control behaviors by:

- Hosting screening events.

Increase the number of people who are able to manage diabetes by:

- Conducting self-management classes
- Increasing patient referrals from healthcare providers for services

Overall Goal

To create a region in which diabetes resources and support are easily accessible and in which everyone is aware of the issue of diabetes.
