

Sexual Health Action Team

Jackson County Healthy Communities Coalition

Objectives:

- Increase the number of young adults who receive comprehensive sexuality education.
- Increase the number of community members educated on healthy consensual interactions.
- Increase the use of barrier contraception to prevent sexually transmitted diseases (STDs) and unplanned pregnancy.
- Increase the number of young adults who are screened for STDs annually by their health care providers.

Strategies:

- Medical provider education to increase screening
- Parent/community education outreach on human sexuality
- Teacher education on comprehensive sexuality education

Overall Goal:

Reduce the transmission of Sexually Transmitted Diseases through the development of healthy sexual interactions.
